

Fire and life safety inspections in healthcare facilities are critical to ensuring the protection of patients and those treating them.

Harroun Fire Protection's custom portal, powered by BuildingReports.com, provides a range of healthcare reporting formats specifically designed to meet the rigorous requirements defined by accreditation organizations such as The Joint Commission, DNV Healthcare (Det Norske Veritas) and HFAP (Healthcare Facilities Accreditation Program). This not only helps ensure inspections are more efficient and accurate, but that the reports can be easily reviewed for regulation compliance.

Features

- » Historical inspection data integration
- » Automatic device inspection date and mobile-to-report synchronization
- » Inspection data grouped by organization standards
- » Hyperlinked code headings

Benefits

- » Provides complete annual inspection summary as required by accreditation organizations
- » Allows anytime inspection upload while guaranteeing correct field placement on report
- » Consistent and intelligently grouped data provides for easier reviewing
- » Rapid online report navigation

The Advantage

Now you can maximize efficiency, save money and reduce risk by managing critical inspection data with detailed online reports powered by BuildingReports.com—critical information at your fingertips.

Just login to your secure account and review your report, authorize repairs, manage inventory and view inspections. Your information is accessible whenever and wherever you need it and immediately available to print for binder insertion when required.

Verifiable Results

ScanSeries™ operates on a range of standard hand-held devices and smartphones to allow inspectors to easily scan barcoded fire, life safety and security devices for verification of inspection. Additionally, these inspection reports are accessible online immediately following the inspection so building owners and fire and life safety officials can quickly review results and take action if needed.

Intelligent Reporting

Our intelligent reporting system provides comprehensive data and statistical analysis on every device inspected. Data can be compared to past inspections within your specially formatted healthcare report or via your online database to ensure each device meets code requirements. Unique barcode registration records inspectors' progress in real time, preventing missed items, and facilitating fast action on repairs.

Convenient Access

Harroun Fire Protection's custom portal technology, powered by BuildingReports.com, gives users the ability to review and manage fire and life safety inspection reports for all properties, within a secure online database, from anywhere at any time. Service companies, facility managers, accreditation organizations and fire officials all benefit from the unmatched, convenient accessibility.
